Dear Customer,

Urban Impact is very proud to present you with your 2010 **Certificate(s) of Diversion** that outlines how much waste your organization has diverted this past year from the landfill. As a nation, we are producing more waste than ever before and our landfills are reaching capacity. We believe that changing the way we deal with waste is a necessity. Every tonne of paper diverted from landfills through recycling and shredding reduces your carbon footprint by around 3 tonnes. With more and more people becoming concerned about reducing their "Carbon Footprint", Urban Impact salutes your organization's recycling efforts.

The Certificate of Diversion provides your company with documented proof of your efforts to reduce your environmental impact and improve your community. Urban Impact is proud that many customers post their Certificate in their main reception area, while others have created a new feature for their company newsletter.

Urban Impact is a business committed to environmental conservation and global responsibility. In 2010, we collected and diverted 110,000 tonnes of recyclable material from local landfills. Urban Impact is very excited about the opportunity to present your 2010 Certificate(s) of Diversion.

Sincerely

Nicole Stefenelli , President and CEO
